# Arctic Wolf® Aurora Endpoint Security

**OUTCOME-DRIVEN ENDPOINT SECURITY**

## Aurora Endpoint Defense

**Stop threats before they disrupt your business with Aurora's market-leading Alpha AI-driven security, plus detection, and response.**

### Simple and Effective

Powered by the Aurora Platform, Alpha AI prevents attacks before they start—backed by 24x7 detection and response from the world's largest commercial SOC.

### Built for You

While other endpoint solutions charge a premium for advanced features tailored to only the largest SOCs, we focus on delivering the best results for your security budget.

### Security Journey

Move from tactically responding to your endpoint security to a broader security program to assess, mitigate, and transfer cyber risk.

Combine the power of three technologies to drive-down cyber risk in our Endpoint Protection Platform:

- Endpoint Protection Platform
- Endpoint Detection and Response
- Alpha AI for Endpoint

## The Cybersecurity Landscape

Today, organizations are exposed to more cyber risk than ever. In fact, at least seven out of 10 organizations believe that their sensitive data was compromised or breached in the past 12 months.

Organizations have invested their time, energy, and budget on multiple security tools and point solutions to try to solve this challenge. This strategy, however, has yielded negative returns due to alert fatigue, skill shortage, and ineffective security responses.

To address this challenge, what's needed as a foundation is a simple, highly effective endpoint solution and a security operations partner that work together, enabling organizations to spend more time achieving consistent cybersecurity outcomes and building cyber resilience.

Aurora Endpoint Defense provides AI-driven security, detection, and response to stop endpoint threats before they disrupt your business. Designed to be easy to use and highly effective—whether on its own or with 24x7 monitoring—with flexible deployment options so you can strengthen your defenses without overloading your team.

## Take the Right Approach

### Aurora Endpoint Defense

Drive your own security outcomes by combining Aurora Protect with endpoint detection and response.

### Aurora Managed Endpoint Defense On-Demand

Get assistance maintaining your deployment and request on-demand assistance to investigate threats and guide remediation.

### Aurora Managed Endpoint Defense

Get assistance maintaining your deployment and Arctic Wolf's SOC for 24x7 monitoring, alert triage, and Arctic Wolf enacted Response Actions.

## Get the Assistance you Need to Operationalize and Maintain your Endpoint Security.

### Aurora Endpoint Onboarding

Optimize time to value by leveraging the experience of Arctic Wolf Deployment engineers.

### Aurora Premium Support

Get technical support 24x7 and guided troubleshooting for technical issues.

### Outcome-Driven Endpoint Security

**20x** ▼ Powered by Alpha AI for Endpoint Security, Aurora delivers top-tier efficacy ratings while maintaining ultra-low resource usage—**20x less CPU utilization than competing solutions**—even when offline.

**90%** ▼ Speed up your investigations and reduce tedious security analyst demands with **30% faster incident investigation and 90% reduction in alert fatigue.**

**100%** Provides **100% return on investment** according to Forrester Total Economic Impact Report.

---

*End Cyber Threats with the Endpoint Detection and Response capabilities of Aurora Focus.*

- Data collection and exploration
  - Endpoint activity data
  - Forensic-grade log collection
- Threat Detection and Response
  - Suspicious activity detection
  - Malware
  - Fileless threats (memory-based infections)
  - User-behavioral analysis
  - Identity-related threat patterns
  - Alert triage / Incident investigation
- Response actions
  - Contain/uncontain endpoints
  - Terminate/suspend processes
  - Terminate/suspend process trees
  - Log out users
  - Create forensic data packages

## About Arctic Wolf

Arctic Wolf® is a global leader in security operations, delivering the first cloud-native security operations platform to end cyber risk. Powered by threat telemetry spanning endpoint, network, identity, and cloud sources, the Arctic Wolf Aurora Platform™ ingests and analyzes trillions of security events each week to enable critical outcomes for most security use cases. By delivering automated threat protection, response, and remediation capabilities, Arctic Wolf delivers world-class security operations with the push of a button so customers can defend their greatest assets at the speed of data.
